

Technical Manager

Isleham, Monday to Friday, 0800 - 1700

We're looking for a Technical Manager to lead our site Technical team. You will be responsible for delivering the site's Technical strategy and objectives in line with Statutory, Group, Customer and Best Practice standards.

Key responsibilities:

- Develop and lead a robust internal audit system to ensure the control of processes, product quality and traceability exist and are adhered to.
- Manage the site QMS and HACCP systems. Develop and improve the existing systems.
- Lead the site BRC, Assured Produce and other related audits
- Monitor and deliver site quality KPIs through continuous improvement activities.
- Manage the rejection process ensuring full root cause analysis and corrective/preventative action plan is in place
- Create a culture of continuous improvement with in the Technical team and drive continuous improvement on site.
- Work closely with the Procurement and Agronomy teams to ensure all suppliers are approved and meet the required standards.
- Manage the pest control systems for the site and ensure any follow up actions raised during pest control visits are completed.

Key requirements:

- A degree in Food Technology or a related discipline or 3 years QA Management/Technical management experience.
- Experience of quality systems, retailer requirements and auditing.
- Intermediate or Advanced HACCP qualification.
- Experience working in the food industry.
- Full UK Driving Licence

If you would like more information about the role and to apply, please contact hrss@produceworld.co.uk

The closing date for applications is 15 February 2019.
